

Press Release

Argonics and Argonav become part of the Alpatron Marine family

We are pleased to announce that Argonics GmbH and its subsidiary Argonav GmbH will become a new part of the Alpatron Marine family. This further strengthens the long-standing partnership between the companies. The innovative products of Argonics and Argonav around the leading automatic track-keeping system for inland vessels argoTrackPilot and the certified Inland ECDIS in navigation mode argoRadarPilot fit perfectly into the broad portfolio of Alpatron Marine. The intensified cooperation between Argonics, Argonav and Alpatron Marine will excel the joint development of integrated bridge solutions.

The technological leadership of Argonics and Argonav in the field of navigation automation, radar object tracking, sensor data fusion, simulation and control technology in inland navigation, together with the broad expertise and extensive development capacities of Alpatron Marine and its parent company JRC, opens up numerous opportunities for the development of new innovative products in both inland navigation and the maritime sector.

About Argonics / Argonav

Argonics was established on 20 January, 2014. The company's first orders included propulsion control systems for rudder propellers. In November 2017, the company launched the first track-keeping system for inland vessels, which has since become an indispensable component on several hundred vessels: the argoTrackPilot. Since the beginning, Argonics has been able to introduce innovative products in the field of automation of navigation, vessel monitoring as well as simulation and control. At the end of 2020, the company grew even bigger. Argonics established the company Argonav which focuses on Inland ECDIS navigation systems. Argonics together with its sister company Argonav form a technologically leading unit in the field of inland waterway navigation.

About JRC | Alpatron Marine

JRC | Alpatron Marine is a world leading marine electronics producer specializing in the design and manufacturing of industry compliant products. Alpatron Marine is a world renowned supplier of integrated bridge solutions, representing major industry brands and manufacturer of unique complementary products to the JRC portfolio. With the full support of Centers of Excellence in Tokyo, Rotterdam, Singapore and Houston, the combined synergies bring quality and innovation to owners, operators and shipyards, redefining the future of ocean, offshore and river navigation.
