Rethinking Connectivity

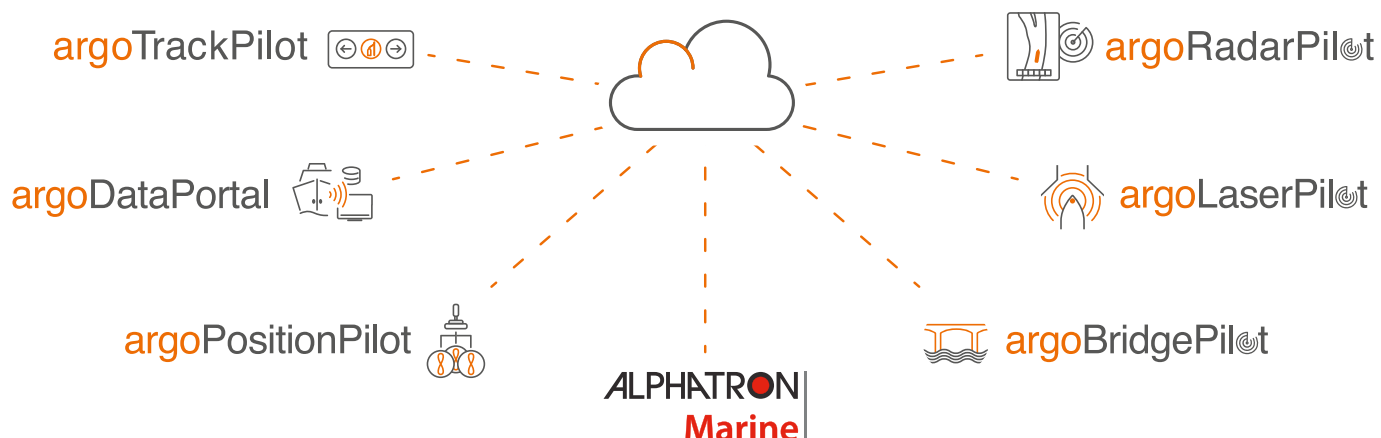

The central service for all products from Argonics, Argonav and Alpatron Marine

argonics

an Alpatron Marine company

argoCloud is the central service
for all products from Argonics, Argonav
and Alpatron Marine.

Features

- A connection of the devices to the **argoCloud** is automatically established via **argoRouter** LTE or through another internet connection.
- For **argoCloud ready** products, no additional hardware is required to connect to the **argoCloud**.
- All **argoCloud ready** products receive updates, store recordings and access live data for operation.
- Data can be flexibly provided to external partners. Through a wide range of APIs, information can be shared in a targeted and controlled manner.

argoDashboard on argoCloud

argoDashboard is your central interface for all data transmitted to the **argoCloud**.

- Everything in view: display of current and historical data
- Easily accessible: directly in the browser – optimally displayed on PC, tablet and smart-phone
- Securely shared: flexible user management and access control for external partners, e.g. engine information for service providers

A complete overview of your entire vessel

With **argoCloud**, you have access to your data at all times. Benefit from a wide range of options for displaying and analyzing your data:

- Travel log and time records
- Navigation data with playback function
- ECDIS, radar, and camera recordings

Everything seamlessly synchronized at all times!
